

Multimodal RAG – Practice PDF

This fictional document contains normal text and structured tables. Use it to practice PDF loading, extraction, chunking, embeddings, retrieval, and multimodal question answering.

1. Company Overview

NovaTech AI develops AI-powered software for businesses. Its products include enterprise document search, intelligent customer support, analytics, and image/document understanding. The company combines large language models with retrieval systems to answer questions from enterprise data.

2. Product Information

Product	Purpose	Users	Launch
NovaSearch	Enterprise document search	Businesses	2023
NovaSupport	AI customer support	Customer teams	2024
NovaAnalytics	AI-powered analytics	Data teams	2025
NovaVision	Image and document understanding	Businesses	2025

3. Quarterly Revenue Data

Use this table to test numerical retrieval.

Quarter	Revenue (Million USD)	Growth
Q1 2025	12	—
Q2 2025	15	25%
Q3 2025	18	20%
Q4 2025	24	33.3%

4. Annual Revenue Chart Data

The following values represent a fictional bar chart of annual revenue:

Year	Revenue
2022	20M
2023	35M
2024	52M
2025	69M

5. Practice Questions

- What products does NovaTech AI offer?
- Which product was launched in 2025 for image and document understanding?

3. What was the revenue in Q4 2025?
4. What was the growth from Q3 2025 to Q4 2025?
5. Which year had the highest annual revenue?
6. What trend can be observed in annual revenue?
7. Which product is designed for customer support?
8. What is the difference between NovaSearch and NovaVision?

6. Suggested Multimodal RAG Pipeline

PDF → Extract text/tables/images → Process modalities → Create representations/embeddings → Vector database → Retrieve → Multimodal LLM → Final answer

Note

All company names and data in this document are fictional and intended only for RAG practice.
