SUMMARY

Software Developer (Fresher) with strong foundation in backend and full-stack development using Django and MERN stack. Experienced in building secure and scalable applications with JWT-based authentication and bcrypt encryption. Familiar with GenAI technologies including RAG, vector databases, and LLM integrations. Focused on writing clean, efficient, and production-ready code.

EDUCATION

B.Tech – Computer Science Engineering 08/2023 – Present | Bhilai, Chhattisgarh
Rungta College of Engineering & Technology, Bhilai, Chhattisgarh

Intermediate 2021 – 2023
PDCEP College, Basaitha, Madhubani

Class 10 2020 – 2021
Awasiya Public School

SKILLS

Languages Python, C, JavaScript	Backend Django, Node.js, Express.js, FastAPI	Frontend React.js, HTML, CSS, JavaScript
Database MongoDB, PostgreSQL	AI/GenAI: LangChain, RAG, Vector DB (ChromaDB)	Tools Git, GitHub, VS Code

PROJECTS

EcoTrack 🌱 04/2026 – 05/2026
Waste Issue Reporting & Resolution System (MERN Stack)

- Built a full-stack web application for reporting and managing garbage-related issues with **separate frontend (React) and backend (Node/Express)** architecture.
- Implemented **JWT-based authentication and authorization** for secure user access control.
- Used **bcrypt** for secure password hashing and credential protection.
- Developed RESTful APIs for complaint submission, tracking, and status updates.
- Designed an end-to-end workflow system to ensure efficient issue resolution and monitoring.

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, bcrypt, REST APIs

AI Chatbot 🤖 03/2026 – 05/2026
PDF Knowledge Assistant (Streamlit + GenAI)

- Developed an AI-powered chatbot that allows users to upload PDFs and interact with document content using natural language queries.
- Integrated **ChromaDB vector database** for efficient embedding storage and semantic retrieval of document chunks.
- Used **Google Gemini API** for generating context-aware responses.
- Built an interactive **Streamlit-based UI** for smooth user experience and file upload handling.
- Implemented document Q&A system using retrieval-based architecture for accurate responses.

Tech Stack: Python, Streamlit, ChromaDB, Gemini API, Vector Embeddings

IMDb Clone 🎬 01/2026 – 03/2026
Movie Listing Platform (Django)

- Developed a full-stack movie database application inspired by IMDb with complete CRUD functionality using Django.
- Designed structured database models and implemented an admin panel for efficient movie data management.
- Focused on clean backend architecture with optimized and efficient data handling.

Tech Stack: Django, Python, SQLite/PostgreSQL, HTML, CSS

COURSES AND CERTIFICATION

MERN Stack 09/2025 – 01/2026
Coding Spoon

Django 07/2025 – 07/2025
Udemy
